

Zsolt Szalay - AI, 4x Certified Adobe Architect, B2B/B2C/A2A

AI Engineer, Full Stack Developer, Tech/Team Leader

Understand the Business and Marketing to make a Bridge to Tech
 9+ years UK, 6 years US Ecommerce, International Projects

Online Resume: <https://BoostMagento.com>

Own AI project: <https://Clusterify.AI>

Technical background

- 10 years Tech Leadership, Team development, Decision making
- 2 years AI development (RAG, Trian LLM, Recommendations, Tools)
- 6 years Python back end development, Microservices,
- 1 year AI's MPC development (Resource and Tool development)
- 1 year Image analysys, object recognition with python
- 5 years ReactJS, NodeJS, Typescript (Front end, Server side)
- 5 years Adobe Ecommerce development (Architect, Back-End, CLOUD)
- 10+ years MAGENTO development (CE, EE, Varnish, Elasticsearch)
- 2 years LARAVEL Framework (Mostly custom projects)
- 7 years Docker based development
- 2 years Data Science, Python, Pandas, FLASK, Machine Learning
- 10 years app performance analysis
- Strong SEO experience for ecommerce
- Docker, Docker based development and flow
- SAML IdP and SP building for SSO/SLO
- Strong Database knowledge (MySQL, PostgreSQL, Oracle, MongoDB)
- Type 1 and 2 virtualization
- Elasticsearch, Data Analysis and Visualization
- Fast data queue systems
- GIT, Agile

My AI DEMOs

- [AI Math Tutor for US Grade Levels](#)
- [Cognitive Add To Cart](#)
- [Workflow Automation with AI Agents](#)
- [Conversational AI Marketing](#)
- [My AI Blog](#) (learn about me in my blog)

My Certificates

- Adobe/Magento 2 Associate Developer
- Adobe/Magento Developer PLUS
- Adobe/Magento Developer
- Adobe/Magento Front End Developer
- Introduction to Data Science, U.of Michigan
- HubSpot Inbound Marketing
- Information Security Awareness PCI-DSS
- XenServer 6.0 Administration
- 6x Oracle study certification
- BigCommerce Stencil

My Specialities

- Responsibility for strategy decisions
- Understand Business and Marketing language
- Delivering in time
- Quick understanding of problems
- System Architect Design
- Ecommerce performance
- NextJS - React, NodeJS, Typescript
- Varnish as FPC
- Data aggregations
- Data analysis and Visualization
- Redis key-value server
- Nginx
- Deployment management
- Big Data
- Data messaging/queue

Other knowledges

- Tech and Team Leadership
- Blockchain technology
- Nginx, Apache web servers, WSGI (GeoIP, Device detection....)
- Redis Key-Value server, central cache, full page cache and session storage
- Varnish cache server
- Beats, Logstash and Kibana for data flow and visualization
- Lucene-Solr Search Engine Server
- FPC - LightSpeed - Memcached - custom solutions

Zsolt Szalay - AI, 4x Certified Adobe Architect, B2B/B2C/A2A

Certificates

- 2019
 - **Adobe / Magento 2 Associate Developer**
- 2019
 - **Introduction to Data Science in Python**
 - Authorized by University of Michigan and offered through Coursera
- 2018
 - **BigCommerce Stencil Development**
 - Study and Certificate for the current company
- 2017
 - **Hubspot Academy Inbound Certified in 2017**
 - Hubspot is a US based market leading inbound company in 100 countries.
 - <https://www.hubspot.com/>
 - Date: Dec, 2016, Expire: Feb, 2018
 - The bearer of this certificate is hereby deemed fully capable and skilled in Inbound Methodology. He has been tested on best practices and is capable of applying them to attract strangers, to convert visitors, to close leads and to delight customers.
- 2017
 - **Information Security Awareness in the Workplace including PCI-DSS**
 - CFISA (The Center For Information Security Awareness)
 - <https://www.cfisa.com/>
 - Aug 31, 2017
 - Registration No.: 4def9f90-8eae-11e7-bc93-c193cae5ac87
- 2016
 - **Citrix XenServer 6.0 Administration - Installation Guide**
 - Citrix's XenServer is the 2nd largest server (Type 1) virtualisation solution in the World. Big companies like Amazon (AWS) and other server platform providers are based on this virtualization solution.
 - <https://xenserver.org/>
 - Apr 16, 2016
 - This is certify that Zsolt Szalay successfully completed the Citrix XenServer 6.0 Administration - Installation Guide online course
- 2015
 - **Adobe / Magento Certified Developer Plus**
 - Date: March 27, 2015
 - Registration no.: zfaln5009
- 2014
 - **Adobe / Magento Certified Developer**
 - Date: Sept 26, 2014
 - Registration no.: z48lon50d6
- 2014
 - **Adobe / Magento Certified Front-End Developer**
 - Date: Dec 16, 2013
 - Registration no.: xfdlon5226
- 1998
 - **Oracle Education study Certificates:**
 - Introduction to Oracle: SQL and PL/SQL development
 - Oracle8 database for administrators
 - Oracle system network
 - Oracle7 system tuning
 - Oracle7 system backup and restoring
 - Oracle7 database administration

Recommendation from CTO of BAVauto (BMW) on LinkedIn

"I had the pleasure to work with Zsolt for the past three years and directly as his direct manager for the past year. His extensive knowledge of Magento EE was what I was looking to add to our staff when he became available. He demonstrated a huge capability to add many new ideas and out of the box problem solving to our robust Magento site by adding Kibana tools including Elasticsearch creating shopping experiences only reserved for the largest companies. He is able to understand and develop solutions in a smart and thoughtful way to improve performance, SEO and UX simultaneously. We were working on merging headless web pages with Magento EE at the end of our time together. Zsolt has a complete understanding of the architecture needed to provide fast and amazing pages to ecommerce websites from setting up the environment to payment processing. There is no one that I would rather work with a Magento or WordPress project. He is an asset in work and in life."

More recommendations on my LinkedIn page: <https://www.linkedin.com/in/zsoltszalay>

I'm proud of

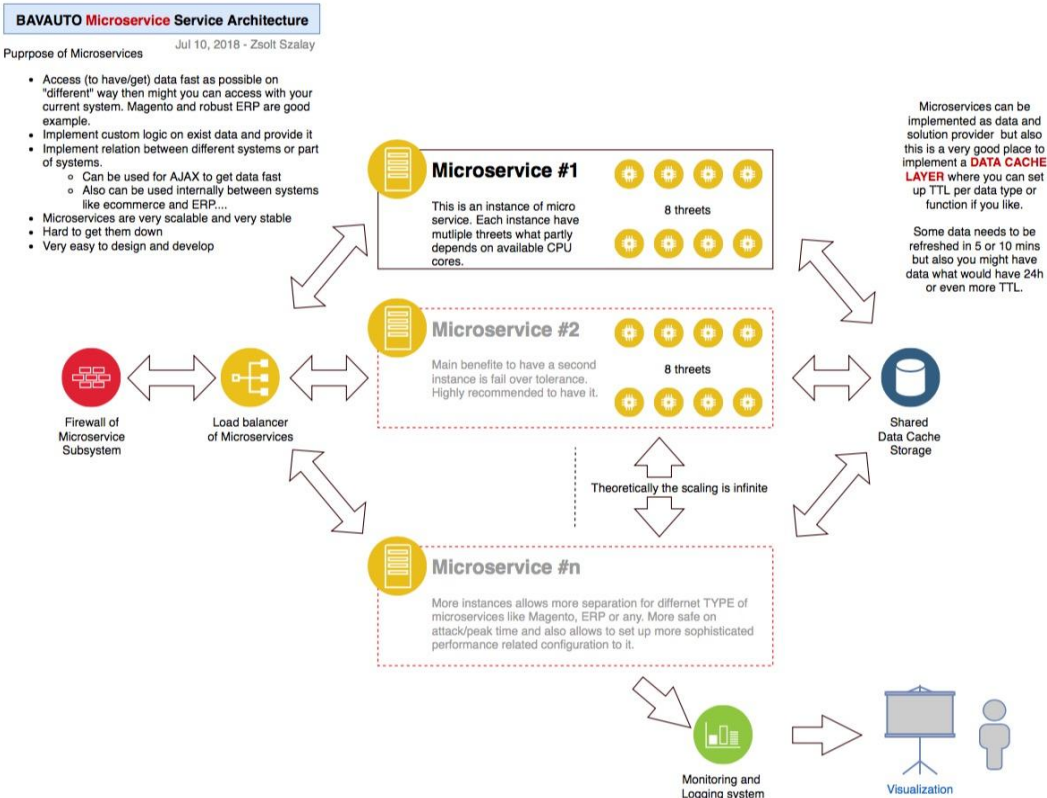

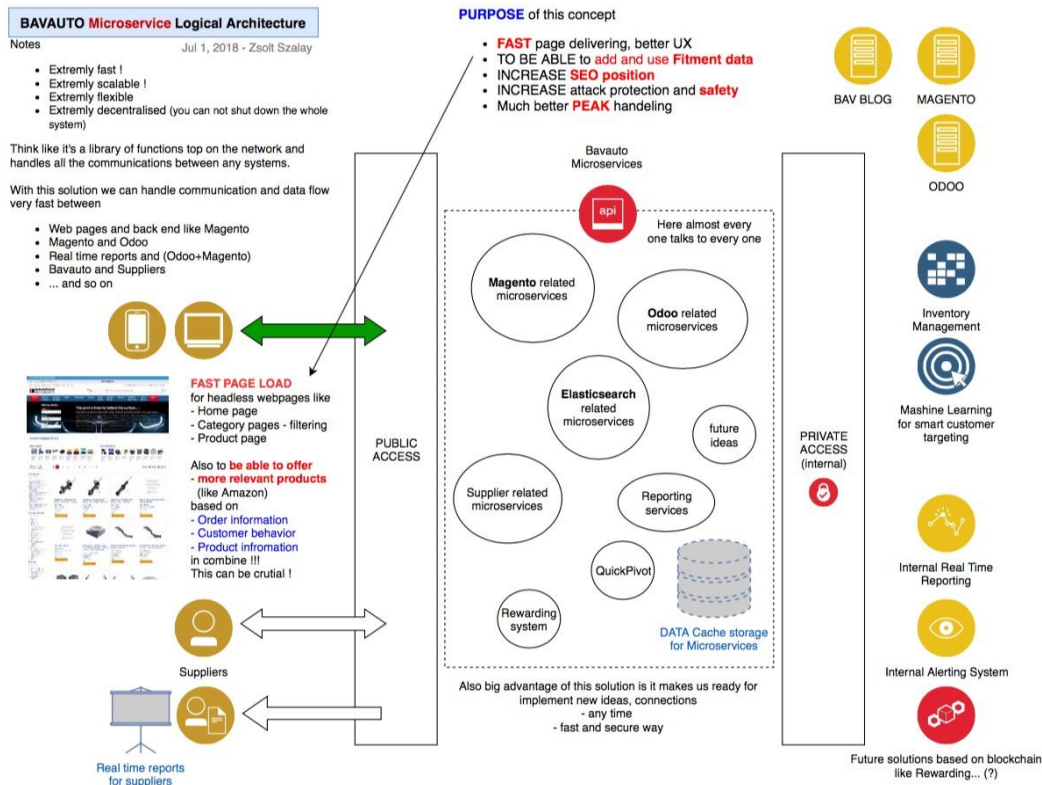

To understand data and to be able to use it are two different things.

Let me highlight the **REAL TIME** factor! This is beyond Magento and you need something more.

At BAVauto (BMW) I have designed and built from scratch a system based on a few ideas that I had for a long time. I am glad BAVauto was open enough and it was a win-win project in the end. It was very powerful and based on Elasticsearch, Microservices (python), Magento and their ERP. I built a microservice layer between all of them to manage communication and enjoy other benefits of it. In the back-end this layer was able to provide fast response to Magento for instance based on Elasticsearch. I have built a complex data deployment process to deploy Product, Order and Customer data into Elasticsearch and on top of that we were able to create and discover charts in Kibana immediately. More importantly the microservice layer was able to deliver complex and front-end ready data to Magento. As a result of this architect we had some very powerful modules which you can see below. Please take your time and have a look:

Zsolt Szalay - AI, 4x Certified Adobe Architect, B2B/B2C/A2A

I'm proud of: Idea, architect, implementation from scratch

Zsolt Szalay - AI, 4x Certified Adobe Architect, B2B/B2C/A2A

Data Visualization (2017 - 2019) This is also beyond Magneto and very powerful

2017-2019 **REAL TIME** server logs to detect anomalies or even attacks.

Enterprise level data queue for multiple server environments to deliver real time data for visualization.

Helps in Magento troubleshooting, detecting network anomalies very easily.

Similar to New Relic but here you can deal with exact Apache/Nginx/Redis/Memcache/Magento log files. Easy and self hosting.

2017-2019 **REAL TIME** Magento Orders, Products, Shipping statistics, Order related product insights.... And so on! Real time and without affecting Magento's database.

Magento order can have 200+ attributes in some cases. There is NO "question" that you can not rise from this database as a business!

Very powerful information/insights for business and marketing.

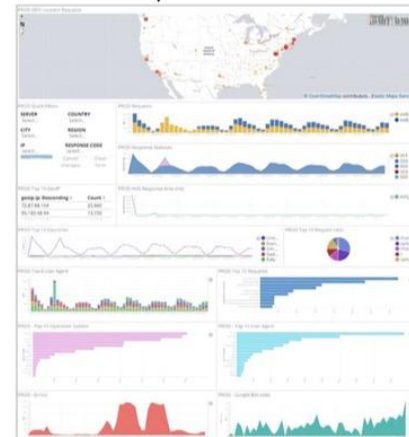

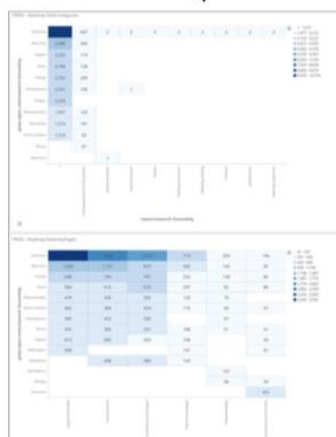

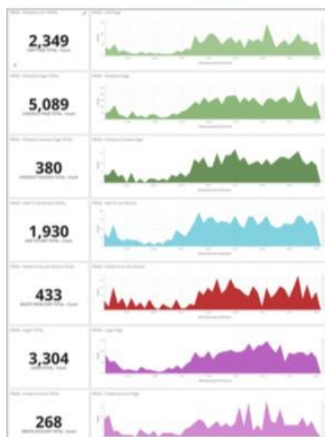

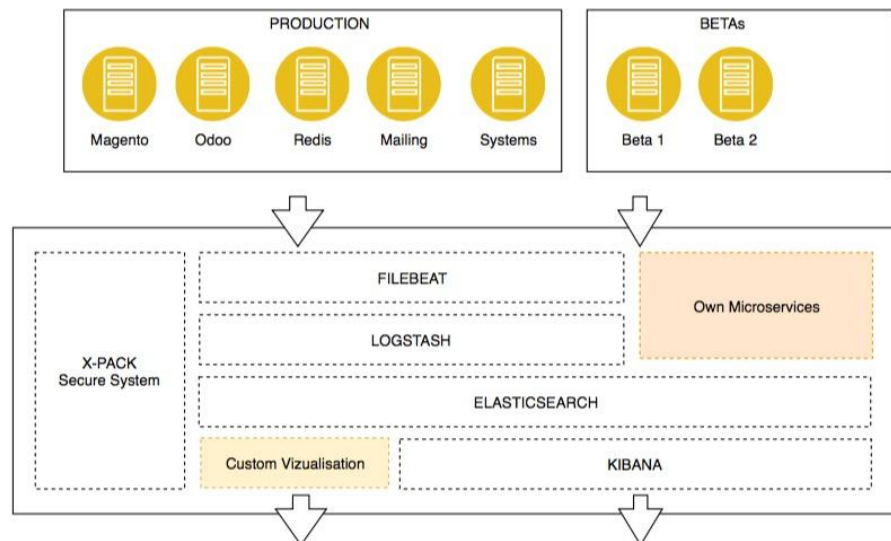

BAVAUTO Real Time Data Visualization

Notes Jul 1, 2018 - Zsolt Szalay

- System trouble shooting on server and software level
- Real time picture about own data
 - Order information
 - Customer behavior information
 - Product information

We have been using this technology in the last 3-4 months and it was extremely useful to find issues like

- Magento errors ! (we had 3+million errors in 2017)
- DDoS attacks ! (our biggest attack has have 10+ million hits in a very short period of time and site was down)

MAGENTO Projects (2017 - 2019) as Lead Magento developer and Director of technology

2022- INQUISICORP
2025 SonLight.com
BookShark.com

Team Leader Software Engineer, Magento Architect. Design a new architect that can support the Company's e-commerce. Lead the developer team and introduce new technologies like micro-services, data-aggregation based information dashboards, data flow management, software development flow. Also design in mid/long term tech changes for better UX.

2020- BYL Connect
2022

As Head of IT, I had to design and build a multi Magento system for a big number of SUPPLIERS and on the other side thousands of SELLERS (as stores). This setup requires a high performance architect to manage both sides and all the stores. Translate business requirements to stories and tasks, then support the Developer team, QA team and DevOps to make these happen.

2019- Mediotype.com
2020

As a Magento expert and project tech leader I'm so excited to work at Mediotype/BlueAcorn iCi. I'm working on **Magento Commerce Cloud** projects like ZAGG. Magento upgrade, data migration. On the B2B side module designing and development from scratch. Magento Coding Standard for the team.

2018- www.BavAuto.com
2019  

Bavarian AutoSport - BMW & MINI - Director of Technology Architect, performance and data related solutions. Start to use Elasticsearch for Products, Orders and Logs. Kibana for data visualization. Microservice solutions for fast data flow and big data handling. SEO improvements and work out a business related information board. Real time data messaging system to collect different historical data from different areas and visualize that

2017 www.nextdesk.com
www.xdesk.com
 

B2C site. I had to design and architect the whole B2C based on Magento 2. I had to design development workflow, git, kanban board, agile also. Customized solutions for extra fast page load.

2017 www.evodesk.com
 

Legacy issues, troubleshooting and designing migration to Magento 2
